the Transmission  
in one Box!

## OIL CHANGE IM AUTOMATIC TRANSMISSION

WHY A TRANSMISSION OIL CHANGE IS SO IMPORTANT!

### AUTOMATIC TRANSMISSION.

Today, a comfort system that has become indispensable - in the past it was more of a luxury feature. However, they were installed more often than one would think and so the misbelief that automatic transmissions have an infinite life span also developed over time - far from it!

Especially with the age of the vehicle, there is an enormous wear in the transmission. This manifests itself through unclean shifting, jerking during gear changes or the transmission shifting much too early or too late.

Due to the increasing age, the transmission oil loses viscosity (toughness of the fluid), which leads to reduced lubrication.

**1. Häufige Schwachstelle:**  
durch starke Verschmutzungen werden die Gitter der Getriebekanäle verstopft, was zum kompletten Ausfall führen kann.

**2. Eine der Ursachen:**  
Späne die durch den Abrieb im Getriebe durch die magnetische Ablassschraube angezogen wurden.

The transmission therefore has to work harder and transmission oil combustion occurs.

As a result, the oil level in the gearbox drops and causes greater wear. The abrasion chips are carried along in the oil circuit, damage the working components

and partially block the oil inflow paths. The end result: if no maintenance is carried out, gearbox damage is inevitable.

It is therefore extremely important to change the oil in the gearbox regularly. Depending on the manufacturer's specifications, a maintenance interval of 60,000

to 100,000 km or 3 to 5 years should be observed in order to maintain shifting comfort and care for the transmission.

The quality brand VAICO has been dealing with transmission components and maintenance parts for over a decade.

Users and workshops benefit from the extensive „know-how“ of the transmission experts and at the same time benefit from the practice-oriented EXPERT KITS+.

With the EXPERT KITS+, VAICO offers comprehensive repair solutions, including gear oil changes. These transmission filter kits not only contain smaller components such as screws, filters and seals (composition depending on the transmission) but also several variants of the appropriate transmission oil in the correct change quantity (also available including flushing quantity).

(A gearbox oil change should only be carried out by specialist workshops)

Advantages	Transmission Oil change	Transmission Oil flushing
Constant lubrication	✓	✓
Consistent oil level	✓	✓
Abrasive shavings are removed	✓	✓
Residue free cleaning (used oil, clumps, abrasion)		✓
Mechanical problems detected at an early stage		✓
Service life is significantly extended		✓

# THATS WHAT WE WILL OFFER YOU!

TRANSMISSION | 22101

With **VAICO** we offer you decades of experience in the field of gear units. That's why our **Expert Kits+ of transmission filters** are designed so that we can offer you something for every service level of transmission maintenance. Do you already have the transmission oil but all you need is the right set of parts?

No problem with our basic **Expert Kits variant (BEK)**: here you only get the parts set you need.

Our **standard kit**, on the other hand, provides you with the exact amount of transmission oil you need to change the vehicle.

But if that is not enough, you also get our **XXL version** with the perfect change and flushing quantity for the vehicle transmission.

All our **transmission filters Expert Kits+** can be found at: [www.vierol-shop.de](http://www.vierol-shop.de)

## The EXPERT KITS+ products consist of:

exact  
Oil change quantity

Oil flushing quantity

Plug-in housing

Transmission  
filter

Seals

Mounting material

Oil pan gasket  
(Transmission)

Oil pan magnet

## VAICO'S AUTOMATIC TRANSMISSION OIL CHANGE

About 230 EXPERT KITS+ and over 500 components at [www.vierol-shop.de](http://www.vierol-shop.de)

- high market coverage
- strong availability
- high wear resistance
